

# Enjoy gentle and effective care with Philips Sonicare

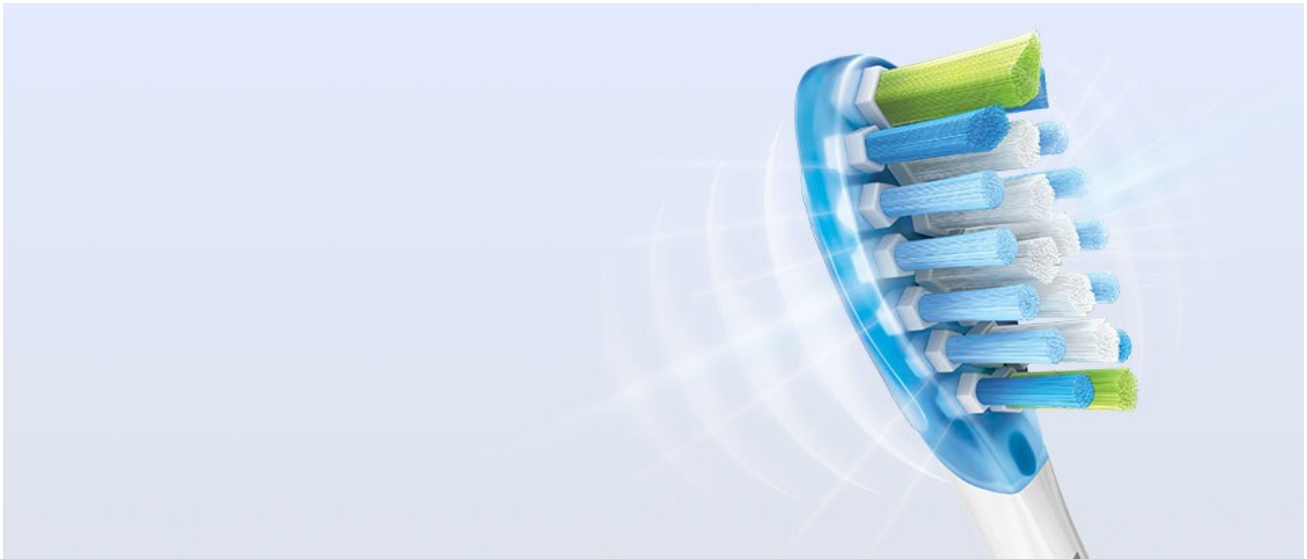

## **Sonicare fluid technology**

Philips Sonicare's advanced technology pulses fluid between the teeth and along the gum-line whilst sonic brush-strokes gently and effectively remove plaque to improve gum health.

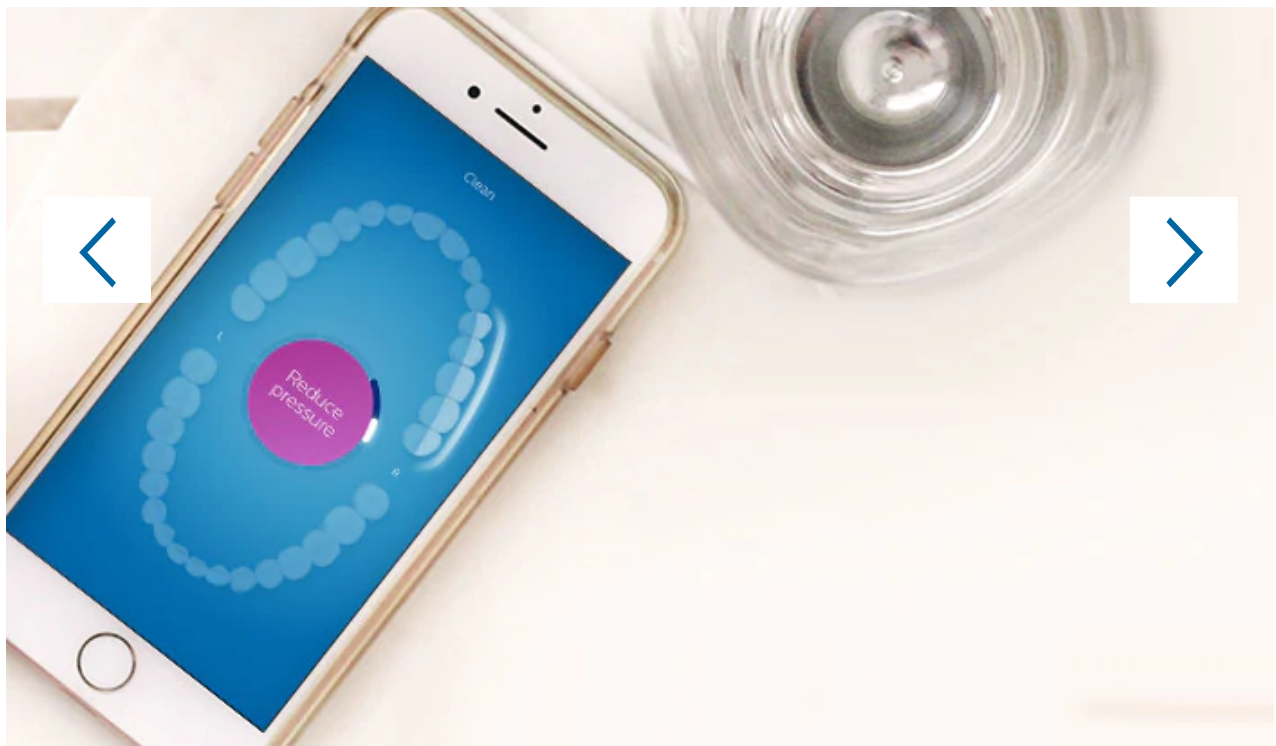

**Did you know?**

Sonicare smart brushes deliver up to 62,000 brush movements per minute, giving you the equivalent results of a whole month's worth of manual brushing in just two minutes.

**Clinically proven for a superior clean**

All Sonicare toothbrushes and brush-heads are clinically tested to consistently ensure the most effective and yet gentle clean.

Built-in smart sensors take the guesswork out of brushing. Real-time feedback technique to 100%.

### **Different modes for all dental needs**

Set the mode and intensity for the perfect, personalized brushing experience. From gum health, plaque removal and whitening, there's the ideal setting for your needs.

### **Brush head replacement reminder**

BrushSync technology tracks how long you've been using your brush head for, and how hard you've been brushing. When it's time to replace it, a light on your handle and a short beep will let you know. That way, you can be sure your brush head is doing a good job.
