When a product formulated by a doctor and listed by pharmacies for over 65 years becomes a backstage favorite.

## Since 1950

In 1950, a dermatologist from a Parisian hospital specialized in skin pathologies, created the Lait-Crème Concentré, which has since become a “cult product” sold by millions around the world.

Driven by the same philosophy of the essential, and the same requirements for effectiveness and tolerance, the Embryolisse Laboratoires have developed a real expertise in dermo-cosmetic care. From this expertise was born a whole range of skincare products, followed by a range of make-up “primers”, passed on from mothers to daughters, and from generation to generation.

This range fully answers the needs of face and body to maintain a healthy and beautiful skin. It has the unique particularity of being approved by dermatologists, as well as chemists and make-up professionals.

## The Lait-Crème Concentré, backstages' favorite

Not a set, a dressing room, nor a fashion show's backstage, without the Lait-Crème Concentré being under the spotlights. It is the favorite product of make-up artists everywhere in the world and the beauty secret of stars.

Quite naturally, Embryolisse has developed a range of skin cares that improve the skin and enhance its radiance, Artist Secret®.

## **Dermo-cosmetic expertise, providing the skin with its essential requirements**

Because skin that is well nourished and moisturized is smoother and plumper, Embryolisse formulations provide the essentials: all the nutrients and moisture the skin needs to be in full health, looking young and beautiful.

Nothing unnecessary, so that the skin is not over-sensitized for no good purpose.

## Effective and Highly tolerant

Embryolisse' formulas include in priority ingredients of natural origin, extracted from flowers and fruits, with recognised virtues and a long tradition of medicinal or cosmetic use (shea butter, beeswax, aloe vera, soy), combined with cutting-edge dermatological active ingredients such as hyaluronic acid and collagen.

All Embryolisse products abide by a strict formulation charter which is the result of pharmaceutical practices. Produced under pharmaceutical supervision and tested by dermatologists, they incorporate the right active ingredients in the right quantities, and are suitable for use on even the most sensitive skin.
